

User Manual for User Removal Form

Introduction :

The User Removal Form is a simple application designed for removing users from the system. This manual provides step-by-step instructions on using the removal form to select and remove users.

Getting Started:

Launching the Application:

- Run the application executable file.

The User Removal Form will appear on your screen.

Form Elements:

- The form consists of various input fields and buttons to facilitate user removal.

Removing a User

Selecting User Details:

- Use the dropdown menus to select the details of the user you want to remove:
- User Name
- Name
- Surname
- Email Address

Enabling Other Fields:

- After selecting the user's name, other fields will be enabled and populated with the user's information.

Confirmation:

- Confirm the user removal by typing "Yes" in the prompted dialog box.

Removing the User:

- Click the "Remove User" button to remove the selected user from the system.

Validation:

- The system will display messages for successful user removal or any errors.

Cancelling User Removal:

- Click the "Cancel" button to clear all fields and close the form.

Help Section

Accessing Help:

- Click the "Help" button to open the user manual (PDF file).

PDF Viewer:

- The PDF viewer will open with detailed instructions on using the removal form.

Additional Information

Database Connection:

- The application connects to the user database upon activation. Ensure the database file is in the correct location.

Auto-Fill Feature:

- As you select the user's name, other fields will be automatically filled with the corresponding user information.

Closing the Application

Click the "Cancel" button to close the form and exit the application.

Note: For any additional assistance, please refer to the provided PDF manual or contact your system administrator.
